LATE BREAKING: King Gold Mine Waste Blowout

(Emergency Event – Closed)

Region VIII contacted the ERP to assist with data review for the King Gold Mine Waste Blowout incident at

the request of the San Juan Basin Health Department, located in Durango, CO.
Response: The ERP

reviewed the EPA data collected in the river after the King Gold Mine clean up site's waste en-catchment

released mine waste into the Cement Creek which flows into the Animas River. The response was

prepared with consultation of the DHCI Medical Officer.
